Professional Profile

FullStack web & mobile developer with over 4 years of experience, specialized in **PHP**, **JavaScript** and **TypeScript**, with expertise in **Angular/Node.js** and **Symfony** frameworks. Strong command of relational and non-relational databases. Passionate about design systems and web service architecture, I design high-performance, scalable, and secure applications. Proactive, autonomous, and comfortable in agile environments, I am fully committed to delivering quality solutions.

Professional Experience

FullStack Developer — GeoMadagascar

June 2022 — May 2026

Antananarivo, Madagascar

- Contributed to the development of front-end and back-end parts for various projects within the company.
- Responsible for database management and SQL query optimization.
- Deployment and active supervision of application performance and smooth operation.
- Managed a team of 4 people on a project.

Technologies: HTML, CSS, JavaScript, PHP, Symfony, Python, Fast-API, Angular, Apache, MySQL, PostgreSQL, Twig, Mercure, Leaflet, GeoJSON, MapLibre, Git, Docker.

FullStack Developer — App-Proz Project

May 2025 — July 2025

Mauritius (Remote)

App-Proz is an innovative online platform designed to facilitate access to employment for trainers while offering training organizers a simple and effective tool to publish their assignments.

- Created a user interface suitable for all types of devices.
- Integrated geographical map via Leaflet.

Technologies: HTML, CSS, Tailwind, JavaScript, TypeScript, Leaflet, Next.js, Prisma, Git.

FullStack Developer — TicketUp Project

January 2025 — June 2025

Freelance - Part-time

TicketUp is a mobile application that facilitates online ticket sales and event management. Users purchase their tickets easily, while organizers can publish their events, track sales, and manage access via an intuitive dashboard.

- Involved in all layers of the application, from the user interface to the server logic.
- Optimized database performance through analysis and improvement of SQL queries.

Technologies: HTML, CSS, Tailwind, JavaScript, TypeScript, React-Native, Angular, Symfony, API Platform, MySQL, PostgreSQL, Node.js, Mercure, Git.

Front-End Developer — Sayna

July 2020 — December 2020

Freelance - Micro-task

We work on very short missions, in the form of micro-tasks, and are paid based on the tasks completed.

- Translated graphic mockups provided by designers into functional web pages using HTML, CSS, and JavaScript.
- Responsive Design: adapted the site to all screen sizes.

Technologies: HTML, CSS, Tailwind, JavaScript, TypeScript, Laravel, Angular, Git, Python, Fast-API.
