Professional Profile

Full-stack web & mobile developer with over 4 years of experience, specialized in **PHP**, **JavaScript** and **TypeScript**, with expertise in **Angular/Node.js** and **Symfony** frameworks. Strong command of relational and non-relational databases. Passionate about design systems and web service architecture, I build high-performing, scalable and secure applications. Proactive, autonomous and comfortable in agile environments, I am fully committed to delivering quality solutions.

Professional Experience

Full-Stack Developer — GeoMadagascar

June 2022 — May 2026

Antananarivo, Madagascar

- Contributed to the development of the front-end and back-end components of various company projects.
- Responsible for database management and SQL query optimization.
- Deployed applications to production and actively monitored their performance and stability.
- Managed a team of 4 people on a project.

Technologies: HTML, CSS, JavaScript, PHP, Symfony, Python, Fast-API, Angular, Apache, MySQL, PostgreSQL, Twig, Mercure, Leaflet, GeoJSON, MapLibre, Git, Docker.

Full-Stack Developer — App-Proz Project

May 2025 — July 2025

Mauritius (Remote) App-Proz is an innovative online platform aimed at making it easier for trainers to access employment opportunities, while providing training organizers with a simple and effective tool to post their assignments.

- Designed a user interface adapted to all types of devices.
- Integrated geographic maps using Leaflet.

Technologies: HTML, CSS, Tailwind, JavaScript, TypeScript, Leaflet, Next.js, Prisma, Git.

Full-Stack Developer — TicketUp Project

January 2025 — June 2025

TicketUp is a mobile application that simplifies online ticket sales and event management. Users can easily purchase their tickets, while organizers can publish events, track sales and manage access through an intuitive dashboard.

- Worked across all application layers, from the user interface to the server-side logic.
- Optimized database performance through the analysis and improvement of SQL queries.

Technologies: HTML, CSS, Tailwind, JavaScript, TypeScript, React-Native, Angular, Symfony, API Platform, MySQL, PostgreSQL, Node.js, Mercure, Git.

Front-End Developer — Sayna

July 2020 — December 2020

We worked on very short assignments, in the form of micro-tasks, and were paid based on the tasks completed.

- Translated graphic mockups provided by designers into functional web pages using HTML, CSS and JavaScript.
- Responsive Design: adapted the website to all screen sizes.

Technologies: HTML, CSS, Tailwind, JavaScript, TypeScript, Laravel, Angular, Git, Python, Fast-API.
